

Senior Natural/Adabas Developer

Are you looking to be part of a growing organization? Are you looking for a place to turn your ideas into solutions? Well look no further at MetroStar Systems, a Microsoft Gold Certified Partner, we have what you are looking for. MetroStar offers a fast paced, friendly environment with incredible growth potential. We also offer the ability to work with cutting edge Microsoft technology, personalized career development plans and the opportunity to become the next Metro - "STAR".

Job Description:

Act as Sr. Adabas/Natural developer with the responsibility of developing and modernizing existing insurance administration and financial services applications operating in a UNIX/Solaris environment using Software AG Natural/Adabas. The developer builds application modules using Software AG development tools to include front-end development, server-side development and the core database. The developer participates in all aspects of the software development lifecycle, including technical requirements analysis, technical design, code development and unit testing. The individual utilizes and applies Natural/Adabas coding standards and best practices to developed applications.

The Sr. developer will also modernize existing applications using EntireX Communicator and web services. In cooperation with the program manager, the developer ensures the proper integration of all modules, implements new enhancements and resolves technical issues as required.

Application Development (70%)

- Provides technical consultation and development support for migration/modernization of existing and new systems development.
- Prepares technical specifications for programs to be written; design, code, test, debug, and document programs.
- Defines and communicates Software AG design principles and coding standards for Adabas/Natural to other developers.
- Delivers high-quality solutions.
- Creates backend Natural processes supporting the existing applications.
- Designs and develops new Adabas/Natural modules using EntireX on Solaris UNIX.
- Performs data modeling, Adabas file design, and implementation for new applications.
- Builds web services to access information from existing Adabas/Natural applications.
- Becomes responsible for production deployments.
- Uses SPoD, and Natural for Eclipse for development purposes.

Senior Natural/Adabas Developer

Helpdesk/Operational Support (30%)

- Assists the Helpdesk in resolution of daily system and/or operational issues related to the application modernization efforts.

Preferred Knowledge & Skill:

- Must understand Natural fundamentals and Adabas (MVS, UNIX) internals with at least 5 years of Natural/Adabas programming experience in new development and/or maintenance support of a Adabas/Natural project in a UNIX environment.
- Must understand UNIX fundamentals and commands (Solaris preferred) and possess basic UNIX shell scripting/programming skills.
- Experience in converting or integrating other software applications using Natural/Adabas.

Minimum Qualifications:

- Project experience with insurance and financial applications.
- Proficiency with Adabas/Natural Utilities, MVS JCL and JCL procedures.
- In-depth knowledge of installing and configuring Adabas/Natural and related tools.
- Development experience with XML, SQL and Microsoft Products: Word, Excel.

Company Benefits:

- Paid Time Off
- Training Allowance
- Company Paid Dental/Life/Long Term Disability Insurance
- Partially Paid Medical insurance
- 401(k) Plan
