

## Senior .NET/SharePoint Developer

Are you looking to be part of a growing organization? Are you looking for a place to turn your ideas into solutions? Well look no further, at MetroStar Systems Inc., a Microsoft Gold Certified Partner; we have what you are looking for, a fast paced, friendly environment with incredible growth potential. We offer the ability to work with cutting edge Microsoft technology, personalized career development plans and the opportunity to become the next Metro"STAR".

### Job Description:

Act as Sr. .NET/SharePoint developer with the responsibility of creating technical specifications from business requirements, developing reusable web and database code components using C#, ASP.NET, XML and SQL in support of CLIENT'S document storage and portal software initiatives. This will involve design and coding with SQL Server, Windows SharePoint Services (WSS) and Microsoft Office SharePoint Server (MOSS). This will require data integration using Software AG's product called EntireX Communicator with existing CLIENT'S legacy applications written in Natural/ADABAS.

The developer builds application modules using the .NET Framework (C# and ASP.NET) development environment to include front-end development, server-side development and the core database. The developer is involved in different aspects of the software development lifecycle, including technical requirements analysis, technical design, code development and unit testing for the financial services applications. The individual utilizes and applies .NET/SQL coding standards and best practices for developed code used for CLIENT'S document storage and portal applications.

The Sr. developer will perform programming using EntireX Communicator and web services. In cooperation with the program manager, the developer ensures the proper integration of all modules, implements new enhancements and resolves technical issues as required.

### Application Development (90%)

- Provides technical consultation and development support for existing and new document storage and portal systems development.
- Prepares technical specifications for programs to be written; design, code, test, debug, and document programs.
- Delivers high-quality solutions.
- Data modeling, SQL Server data design, and implementation for new applications.
- Builds web services to access information from existing Legacy (Adabas/Natural) applications.

## Senior .NET/SharePoint Developer (...Continued)

### Desired Skills:

- 5+ years of application development experience using the Microsoft .NET Framework with C#, ASP.NET and SQL Server.
- 2+ years of development experience with Windows SharePoint Services 3.0 (WSS) and Microsoft Office SharePoint Server 2007 (MOSS).
- 2+ years in web-based development using C# and ASP.NET in Microsoft IIS.

### Must have:

- Experience in design, development, and administration of SharePoint sites using best practices
- Implementation and development experience of SharePoint web parts.
- Strong understanding of Windows Communication Foundation and Windows Workflow Foundation
- Strong relational database knowledge and experience (entity modeling)

### Must understand:

- Object oriented analysis and design
- HTML and web page design (JavaScript, CSS style sheets, document object model)
- XML and web services

### Preferred Knowledge & Skill Areas

- Excellent overall technical skills as well as business consulting skills with the ability to conduct data requirements and process definition meetings with clients.
- Experience with design patterns and development tools (such as NUnit, Visual Studio 2008 Team System and Team Foundation Server) are a plus.
- Development experience with XML, and Microsoft Products: Word, Excel.

### Company Benefits:

- Medical/Dental/Life Insurance
- Paid Time Off
- 401(k) Plan
- Training Allowance

### About MetroStar Systems, Inc.

MetroStar Systems (MetroStar) focuses on developing critical business solutions for both the public and private sector, to produce immediate value from an abundance of centralized and disparate data sources. MetroStar core competencies are Systems and Software Integration, Portal Strategy and Real Time Communication, Program Management, Legacy Systems, LAN and Help Desk Support. Through our "Committed to Excellence" approach, MetroStar's objective is to deliver today's collaborative solutions to address critical business problems, and process in-efficiencies commonly found in most organizations. By doing so, we immediately bring knowledge management, fusion, automation and information superiority to your most critical and sensitive data.
