

Senior Software Engineer

Are you looking to be part of a growing organization? Are you looking for a place to turn your ideas into solutions? Well look no further, at MetroStar Systems, a Microsoft Gold Certified Partner; we have what you are looking for, a fast paced, friendly environment with incredible growth potential. We offer the ability to work with cutting edge Microsoft technology, personalized career development plans and the opportunity to become the next Metro"STAR."

Summary of Position:

Senior Software Engineer to bring a demonstrated record of leading and developing software in a distributed enterprise environment. Candidate would provide expertise in supporting all aspects of the software life cycle including design, development, deployment, testing, documentation and training. Responsibilities will include using Microsoft technologies to streamline data management and application development solutions for a bureau within the government client site. Candidate should have good communication skills and able to work within a structured team environment.

Description of Project:

MetroStar provides architecture and deployment support for the Microsoft SharePoint effort for a government client. The client portal was deployed to promote inter-departmental collaboration and to increase awareness drive by everyday activities and tasks. MetroStar was brought in for Subject Matter Expertise in SharePoint Product Technologies to advance the development and provide guidance in direction and detailed role-out.

Project details include using 3rd party Web Part tools provided by various vendors including CorasWorks to satisfy the ad-hoc requirements of the client. MetroStar will also be providing custom .NET development in support of the effort to have SharePoint replace the common desktop environment within the government client environment using an Active Desktop concept. By providing this functionality, users will access all departmental and daily computing data including proprietary applications and standard Microsoft Office applications through one common framework.
