

## Senior Systems Engineer

Are you looking to be part of a growing organization? Are you looking for a place to turn your ideas into solutions? Well look no further at MetroStar Systems, a Microsoft Gold Certified Partner, we have what you are looking for. MetroStar offers a fast paced, friendly environment with incredible growth potential. We also offer the ability to work with cutting edge Microsoft technology, personalized career development plans and the opportunity to become the next Metro - "STAR".

### Job Description:

The Senior Systems Engineer oversees the physical transition of Metrostar products through their lifecycle. The position requires that the individual work with internal IT to set up the required physical systems for projects at both machine/ OS and application layers and ensures that these systems correctly reflect the eventual client site deployment environments. They provide guidance to developers on system architectures and to IT on building those architectures. The System Engineer is also client facing and may help with actual client side installs.

### Responsibilities:

- Coordinate system development tasks to include design, integration and formal testing.
- Oversees all transitions into production.
- Develop and complete actions in system specifications, technical and logistical requirements and other disciplines.
- Create and maintain programmatic and technical documentation to insure efficient planning and execution.
- Manage and document system configurations.
- Install all new hardware, systems, and software for networks.
- Install, configure, maintain network services, equipment and devices.
- Supports administration of servers and server clusters.
- Manages all system back-up and restore protocol.
- Plans and supports network and computing infrastructure.
- Perform troubleshooting analysis of servers, workstations and associated systems.
- Documents network problems and resolution for future reference.
- Monitors system performance and implements performance tuning.
- Manage user accounts, permissions, email, anti-virus, and anti-spam.
- Requires a thorough knowledge of networking essentials.
- Oversee software and network security.

### Required Skills:

- SIPRnet and NIPRnet experience
- Experience with Windows Infrastructure
